**Current Ratio**

The current ratio is a liquidity ratio that measures a company's ability to pay short-term obligations or those due within one year. It tells investors and analysts how a company can maximize the current assets on its statement of financial position (balance sheet) to satisfy its current debt and other payables.

**Acid test Ratio or Quick Ratio**

The acid-test, or quick ratio, compares a company's most short-term assets to its most short-term liabilities to see if a company has enough cash to pay its immediate liabilities, such as short-term debt.

**Solvency Ratio**

Solvency ratio is one of the various ratios used to measure the ability of a company to meet its long-term debts. Moreover, the solvency ratio quantifies the size of a company's after-tax income, not counting non-cash depreciation expenses, as contrasted to the total debt obligations of the firm. Also, it provides an assessment of the likelihood of a company to continue congregating its debt obligations.

**Debt-to-equity Ratio**

The debt-to-equity (D/E) ratio is used to evaluate a company's financial leverage and is calculated by dividing a company's total liabilities by its shareholder equity. It is a measure of the degree to which a company is financing its operations through debt versus wholly owned funds. More specifically, it reflects the ability of shareholder equity to cover all outstanding debts in the event of a business downturn. The debt-to-equity ratio is a particular type of gearing ratio.

**Asset-to-equity Ratio**

The asset to equity ratio reveals the proportion of an entity's assets that has been funded by shareholders. A low ratio indicates that a business has been financed in a conservative manner, with a large proportion of

investor funding and a small amount of debt. A high asset to equity ratio can indicate that a business can no longer access additional debt financing, since lenders are unlikely to extend additional credit to an organization in this position.

#### Interest Coverage Ratio

The interest coverage ratio measures the number of times a company can make interest payments on its debt before interest and taxes (EBIT). In general, the lower the interest coverage ratio is, the higher the company's debt burden, which increases the possibility of bankruptcy.

#### Return on Assets (ROA)

The Return on Assets (ROA) figure gives investors an idea of how efficient the company uses the assets it owns to generate profits. The higher the ROA number, the better, because the company is earning more money on less investment.

#### Return on equity (ROE)

Return on equity (ROE) is a measure of financial performance calculated by dividing net income by shareholders' equity. It is considered a measure of a corporation's profitability in relation to stockholders' equity. Whether ROE is deemed good or bad will depend on what is normal among a stock's peers. A good rule of thumb is to target an ROE that is equal to or just above the average for the peer group.

#### Net Profit Margin

The net profit margin is a ratio formula that compares a business profits to its total expenses. The net profit margin allows analysts to gauge how effectively a company operates. The higher the net profit margin, the more money a company keeps.

## **Real Property Development:**

### **High-end Housing**

**Xavier Estates:** It is the pioneer in premier mixed-use development in Northern Mindanao. This 220-hectare development located at Fr. Masterson Avenue, Upper Balulang, and sprawled on a panoramic plateau overlooking the City has now become 288 hectares through additional acquisitions of adjacent developable areas over the years. It is a perfectly master-planned community which guarantees luxury, elegance, prestige, convenience and security.

**Teakwood Hills:** It is located in Barangay Agusan, Cagayan de Oro City, some 2.3 kilometers from the national highway going uphill. This idyllic enclave has a breathtaking endless view of the mountains and the sea. The roads are eight meters wide and lined with trees. It has a club house with recreational amenities such as swimming pool, billiards, darts and table tennis. Lot sizes start from a minimum cut of 250 sq. m., all with a 180-degree scenic view of the famous Macalajar bay and an elevation of 220 meters above sea level. Percentage-of-completion for Phase 1 is at 83% while Phase 2 is 100% complete.

Teakwood Hills Phase 3 occupies three (3) hectares in the northern portion of the upscale property. It is coined as Belle del Mar (*Charm of the Sea*) as it overlooks the waters. It offers lots for sale at 180sqm to 316sqm. The horizontal development is 98% complete.

**Valencia Estates:** It is located in Barangay Lumbo, Valencia City, Bukidnon. The amenities are patterned after the excellent standards of a plush subdivision with a road network of 15 meters for the main road, 10 meters for the service roads complete with sodium street lamps; a basketball court, a clubhouse with a swimming pool. It also has open spaces and playground, perimeter fence and a 24-hour security service. The project is 100% complete.

**Coral Resort Estates:** The project is considered as the first residential resort estates in Northern Mindanao. It is strategically located in Initao, Misamis Oriental with a total development area of 5.4 hectares. Phase 1-Cluster A and Cluster B of the project with development area of 2.5 hectares and 2.9 hectares, respectively are 100% complete.

Single detached and attached house and lot units are offered with lot area ranging 90-161 sq.m. with floor area ranging 60-110 sq.m. Adelaida Park Residences has single houses sufficiently spaced from each other with its own parking space; is a gated community with ranch-type perimeter fence; has proposed pavilion; and is certified flood free with an elevation of 157 feet above river bank. The horizontal development is 100% complete while the vertical development is at 97%.

**Adelaida Mountain Residences** is a new master planned integrated community rising in the cool hills of Tanay, Rizal. It overlooks views of Sierra Madre Mountains and the Laguna Lake. Being anywhere around 400 to 500 meters above sea level, weather stays relatively cool. With approximately 12 hectares of development, saleable lots range from 252sqm to 834sqm. The horizontal development is at 94% complete.

### **Socialized Housing**

**St. Therese Subdivision:** The subdivision is a 1.67-hectares socialized housing project located in Balulang, Cagayan de Oro that will provide 155 house and lots of which 91 units are row houses, 38 units are duplex, and 26 units are single attached. The project is 100% complete.

**Mountain View Homes:** This project has a development area of 2.3 hectares with 216 saleable house and lots with guard house and basketball court. **Mountain View Homes Phase 2** is a new venture into the socialized and economic housing which is adjacent to the original Mountain View Homes. It is accessible to churches, schools, malls and commercial establishment. The socialized housing project has row houses with lot area of 50sq.m. and floor area of 26sq.m. Single detached units for economic housing have a lot area of 75-143 sq. m. and floor area of 36-38 sq. m. The percentage-of-completion for Phase 1 and Phase 2 are both 100% complete.

**Mangoville** is a socialized housing which was launched on Feb 10, 2018. It is located in Barangay Agusan, Cagayan de Oro, just 1.8 kilometers away from the highway. Mangoville boasts of duplex design houses with its own parking space in a lot area of 67.5 sq.m. with floor area of 22 sq.m. It has a 10-meter-wide main road and 8-meter wide inner roads, with perimeter fence and guardhouse. Mangoville homeowners will enjoy a view of the Macajalar Bay in its elevation of 169 meters above sea level. In 5.5 hours, all 235 units were reserved. The horizontal development is 100% complete while the vertical development is at 94%.

**Adelaida Homes** is the 1st socialized housing project of ABCI in Luzon, specifically situated in Brgy. Sampaloc, Tanay, Rizal. It opened with 137 house and lot units. The row houses have a lot area that starts at 40sqm and floor area that starts at 26sqm. The horizontal development is 100% complete while the vertical development is at 92%.

Similar to Adelaida Mountain Residences, these properties are very accessible to most places of interest like town malls, restaurants, town markets, churches and tourist attractions like swim resorts, eco parks, falls and others within 200m to less than 10km in distance from the project site.

### **Recent Projects:**

The Company's recent projects that were introduced to the market include Coral Resort Estates Phase 2 and Phase 3; Teakwood Hills Phase 3; Ignatius Enclave 2; Adelaida Homes and Adelaida Mountain Residences.

### **Real Estate Revenue:**

Sales recorded for the quarter includes units that were fully booked and were amortizing based on percentage of completion.

### **Palm Oil Mill**

A total of 3,511.51 metric tons of Fresh Fruit Bunches (FFB) derived from internal and external sources were processed (by SGAC) for the 2<sup>nd</sup> Quarter of 2023, compared to 4,042.57 metric tons in the same period of last year (by ABERDI). This has an average of 1,170.50 metric tons of fresh fruit bunch processed per month as against 1,347.52 metric tons of the same period last year. The yield for the 2<sup>nd</sup> quarter of this year was 681.68 metric tons of crude palm oil with an average oil extraction rate of 19.41% as compared to 709.32 metric tons having an average extraction rate of 18.25% for the same period last year. There was no production of CPO by ABERDI since the focus was in the production of Crude Palm Oil (CPO) by SGAC.

The kernels that were produced totalled to 247.32 metric tons as compared to 14.81 metric tons of the same 2<sup>nd</sup> quarter of last year.

### **Refined Bleached Deodorized Oil (RBDO) Plant**

For the 2<sup>nd</sup> Quarter of 2023, the refinery produced 46.67 metric tons of RBDO as compared to the 38 metric tons of the same period last year. In addition, only 3 metric tons of Palm Fatty Acid Distillate was produced this quarter compared to the 30 metric tons for the same period of last year.

### **Fractionation Plant**

The production of Palm Olein and Palm Stearin started in June 2015. The Crude Palm Oil that was produced is further processed into Refined Bleached and Deodorized Oil, the raw material of Palm Olein and Palm Stearin. In the 2<sup>nd</sup> quarter of 2023, 32.5 metric tons of Palm Olein and 16.4 metric tons of Palm Stearin

were produced as compared to none for the same period last year. There were 22.95 metric tons of Palm Olein and none of Palm Stearin were sold 2<sup>nd</sup> quarter of this year from its inventory compared to 0.15 metric tons and none, respectively, for 2<sup>nd</sup> quarter last year.

### **Surigao Greens Agri Corp. (SGAC)**

Surigao Greens Agri Corp. was incorporated on February 11, 2023, with SEC Registration No. 2023020085735-42. ABCI has subscribed one hundred percent (100%) of SGAC's outstanding capital stock at incorporation. SGAC's primary purpose is to engage in the business of processing, milling and refining palm oil to manufacture crude palm oil, Refined Beached Deodorized Palm Oil, Palm Olein, and other products and to distribute such products on a wholesale or retail basis, provided that the Corporation shall not solicit accept or take investments/placements from the public and neither shall it issue investment contracts.

Surigao Greens Agri Corp. (SGAC) has executed an Asset Purchase Agreement consisting of several parcels of land with total land area of Seventy Thousand (70,000) square meters and a Palm Oil Milling Plant located in Tambis, Barobo, Surigao del Sur. The Palm Oil Milling Plant consists of a factory building and machineries with a rated capacity of 10 metric tons (MT) per hour.

The purchase of the Palm Oil Milling Plant in Surigao del Sur will allow access to an existing and operational and cost-efficient crude palm oil milling plant that is able to source palm oil fresh fruit bunches from nearby plantation farms in the region (Surigao and Agusan).

The acquisition will also provide operational and supply chain synergies with existing palm oil milling and refinery facilities in Impasug-ong, Bukidnon that are currently operated by A Brown Energy and Resources Development Inc. (ABERDI), another A Brown subsidiary. Operational and cost-cutting synergies within the group can be realized by having access to more palm oil fresh fruit bunches from nearby plantations, reduced logistics and transport costs, and being better positioned to pursue further growth opportunities in the Group's palm oil business.

### **Power Generation**

#### **Coal-Fired Power Project**

##### **Palm Concepcion Power Corp. (PCPC) – 20% owned by PTCHC**

Palm Thermal Consolidated Holdings Corp. (PTCHC) is 100% owned by A Brown Company Inc. which currently has 20% equity interest in Palm Concepcion Power Corporation (PCPC). PCPC is the project company for the 2 x 135-megawatt coal-fired power plant in Concepcion, Iloilo.

In July 2013, the lending banks signed the term loan financing totaling to Php 10B to partially finance the Engineering, Procurement and Construction (EPC) and finance costs of the project. These were China Banking Corporation (Php 3.5B); Asian United Bank (Php 2.5B) and BDO Unibank, Inc. (Php 4B). BDO Capital & Investment Corporation acted as the Lead Arranger and Sole Bookrunner for the term loan facilities.

The power plant project is located in Concepcion, Iloilo. It is a base load plant that uses Circulating Fluidized Bed Combustion (CFBC) technology that is highly efficient and low-pollution. The first 135MW unit was designed to address the power supply requirements of the Visayas grid and provide a steady flow of power to the growing businesses and economic development in the islands of Panay, Negros, Cebu and even Leyte.

PCPC started construction of the first 135MW in 2013 and was able to complete the project after 37 months and 22 days. Its commercial operations commenced on August 16, 2016. Nine (9) electric cooperatives currently have offtake agreements with PCPC's first 135MW unit for their base load power capacity requirements.

The Environmental Compliance Certificate (ECC-OC-1911-0033) was released by the Environmental Management Bureau of DENR on October 8, 2020 which now covers both Units 1 and 2 of the 2 x 135-MW CFBC Coal-Fired Power Plant Project of PCPC.

## **Bunker-Fired Power Project**

### **Peakpower Energy Inc. (PEI) – 20% owned by ABCI**

Peakpower Energy, Inc. was formed in 2013 to construct diesel/bunker-fired power plant projects designed to generate peaking energy in various A+/Green-rated electric cooperatives in Mindanao. These projects are Build-Operate-Maintain and Transfer (BOMT) agreements for brand new engines, which will last for 15 years through its subsidiaries as operating units: Peakpower Soccsargen, Inc., Peakpower San Francisco, Inc. and Peakpower Bukidnon, Inc.

### **Peakpower Soccsargen Inc. (PSI) – 100% owned by PEI**

Peakpower Soccsargen Inc. (PSI) is a 34.85MW diesel-fired power plant located in General Santos City. It has a 15-year BOMT agreement with the South Cotabato II Electric Cooperative Inc. (SOCOTECO II).

The Energy Regulatory Commission (ERC) issued the Certificate of Compliance (COC) for PSI's first 20.9MW (3 units of 6.97MW) capacity on December 1, 2014. Commercial operations started on January 27, 2015.

The 13.9MW (2 units of 6.97MW) power plant expansion declared commercial operations on September 12, 2017. ERC granted the COC of the expansion on February 20, 2018.

SOCOTECO OO is the largest distribution utility in Mindanao and its franchise area includes General Santos City, the municipalities of Glan, Malapatan, Alabel, Malungon, Kiamba, Maasim and Maitum in Sarangani and the municipalities of Polomolok and Tupi in South Cotabato.

### **Peakpower San Francisco Inc. (PSFI) – 100% owned by PEI**

Peakpower San Francisco Inc. (PSFI) is a 10.4MW diesel/bunker-fired power plant located in San Francisco, Agusan del Sur. It has a 15-year BOMT agreement with the Agusan del Sur Electric Cooperative Inc. (ASELCO).

ERC issued the Certificate of Compliance (COC) for the first 5.2MW capacity on March 23, 2015. Commercial operations started on January 26, 2018.

The 5.2MW power plant expansion was granted its Provisional Certificate of Compliance on September 27, 2017, which was extended on February 20, 2018. The expansion plant started commercial operations on January 26, 2018.

ASELCO's franchise area includes the municipalities of San Francisco, Prosperidad, Rosario, Trento, Bunawan, Veruela, Sta. Josefa, Loreto, Sibagat, Esperanza, Talacogon, La Paz, San Luis and Bayugan City.

### **Peakpower Bukidnon Inc. (PBI) – 100% owned by PEI**

Peakpower Bukidnon Inc. (PBI) is a 10.4MW diesel/bunker-fired power plant located in Barangay Alae, Manolo Fortich, Bukidnon. It has a 15-year BOMT agreement with the Bukidnon Second Electric Cooperative Inc. (BUSECO).

ERC issued a Provisional Certificate of Compliance for the 10.4MW (2 units of 5.2MW) on November 21, 2017, which was extended on February 20, 2018. PBI commenced commercial operation on March 26, 2018.

BUSECO's franchise area includes the municipalities of Libona, Manolo Fortich, Sumilao, Baungon, Malitbog, Talakag, Impasug-ong, Malaybalay, Lantapan and Cabanglasan, all in the Province of Bukidnon.

## **Outlook for the Year and Onwards**

### **Real Estate Business:**

Real estate is and will still continue to be a good investment at all economic levels of society (Villegas, 2020). As shelter is one of the three basic necessities of human beings including food and clothing.

There is still a demand for low-cost and economic housing. Households of low-middle income and middle-middle income are the potential buyers. Many of these households are dependent on the foreign exchange remittances from relatives working overseas. Despite the displaced OFWs who have returned to the country due to the pandemic, there still continues to be close to 10 million abroad who send remittances in 2020.

OFW remittances are expected to bounce back after the pandemic is put under worldwide control. And Philippines population with a 1.6% growth shall be factors to increase housing demand.

For the upper middle-income households, they are markets for lots only. They also buy house and lots units to either acquire their own homes or invest for these units to be rented out.

The real estate sector is still a major contributor to employment and income growth as it continues to be an attractive choice of investment for both domestic and foreign investors. Looking at the young and growing population, the transition of the country from a low-middle income economy to a high-middle income one, and, the expansion of economic activities to the provinces are some of the reasons for this bullish outlook on the real estate sector.

There is a huge unmet demand for housing thus the local real estate market is seen to be resilient. In a downturn, real estate market will naturally correct itself and will be picking up again. The demand for more than 6 million housing units is very clear (Soriano, 2020).

Real-estate investment trusts or REITs, helping to democratize the Philippine property market by allowing smaller investors to participate in high-value real-estate assets, shall pick up (Santos Knight Frank, 2020).

And more developers will be environmentally conscious that are basic attractions for people who prefer the low-density areas coupled with green, open spaces.

High demand and low interest rates will benefit the residential market greatly once things go relatively back to normal (Colliers International Philippines, 2020).

For the rest of the year, there is great potential for the real estate industry, benefiting the residential sector. Developers should keep up with their land banking efforts both inside and outside of Metro Manila, increase facilities, keep up attractive payment schemes, and finish projects on time (Colliers, 2022).

The Philippine economy is beginning to open up, leading to an increase in the number of enterprises functioning at full capacity and on-site employment. Colliers property market report indicates hope that the government's forecasted economic recovery, on-going remittance inflow from Filipinos working overseas, and faster relaxing of movement restrictions will further boost consumer and corporate confidence in the nation.

With the recent elections, Colliers believes that developers are now adopting a more cautious attitude as they assess general consumer sentiment in the face of rising inflation and interest rates and wait for the

announcement of the new administration's economic strategy, which includes pro-property changes. To attract potential buyers, developers are recommended to offer more attractive and innovative promos and payments schemes; highlight features that will set their projects apart and draw discerning clientele; consider obtaining green building certification, particularly in view of the rising need for more environmentally friendly residential construction beyond the Covid-19 epidemic.

In the local front, ABCI emphasizes that real estate is slowly going back to normal. However, the preference of environmental-friendly development is still very high. Between living in a highly urbanized environment and living in the city outskirts, buyer demand will be in areas where there is adequate open space, greenery and home designs with free-flowing air.

### **COVID-19 Global Health Crisis**

Health crisis that became pandemic will certainly have tremendous impact on the economy.

After the spread of COVID-19 led to the lockdown of the entire island of Luzon, which accounts for 73 percent of the country's GDP, economic managers were not so optimistic of its impact.

In May 2023, the head of the UN World Health Organization (WHO) has declared 'with great hope' an end to COVID-19 as a public health emergency, stressing that it does not mean the disease is no longer a global threat.

#### **Impact on Real Estate Sales**

There is a continued rise in the demand for real estate in Northern Mindanao and Caraga shown in the current sales reservations. The Company made an unprecedented move to immediately shift to the digital platform. These include regular online presence through Facebook and direct messaging to the brokers. These are also online facilities implemented to ensure continuity in equity payments and sales reservation. A challenge was posted by buyers who had difficulty transitioning from their traditional banking style to online payments but these were being responded to. There were reduced foot traffic at the onset of COVID-19 to sites. However, this has gradually increased as the Company implemented safety protocols on site. Website is upgraded.

#### **Supply Chain Risks**

There is a potential risk of shortage of construction materials and supplies because of supply issues from sources in COVID-19 affected countries. Shortage of imported construction materials might lead to an increase in development costs.

To mitigate the impact of potential shortages, we have implemented contingency strategies such as increased inventory and advanced procurement of construction materials.

With the recommended social distancing and adoption of flexible work arrangements, our personnel and brokers' efficiency in handling administrative work (e.g. processing of sale documents; processing of government permits and license; etc.) may be impaired.

We have also instituted increased health awareness in all our offices and project sites. Constant disinfecting and sanitation of the offices and model houses in all project sites is done. Constant hand-washing is promoted and health monitoring is conducted.

## **Palm Oil Business:**

The palm oil industry is a promising enterprise as the palm oil continuously being considered as the most important tropical vegetable oil in the global oils and fats industry, in terms of production and trade.

Key industry players are positive about the bright prospects of increasing palm oil production in the world market not to mention the great demand from the domestic market and the prospect of eventually exporting palm oil globally. This growing demand presents an opportunity for ABERDI to expand its current crude oil capacity of 10 tons per hour to 30 tons per hour. This expansion requires an additional 2,800 hectares of oil palm plantation representing 50% of the additional requirement of 5,500 hectares. Suitable lands for expansion are available in Misamis Oriental and Bukidnon Provinces due to its strategic proximity to the mill. More importantly, these areas have adequate and ideal available land; in good climatic conditions; and has a vast potential area for oil palm plantation.

There are now seven (7) out of nine (9) milling plants in the country which are located in Mindanao. On top of this, two (2) additional milling plants are in the pipeline. Out of the nine (9) plants, two (2) have upgraded into refinery plants. ABERDI is the second next to Caraga Oil Refinery Inc. (CORI).

### **Plan of Action**

To respond to the lack of adequate local production, the management has targeted to develop 2,000 hectares of oil palm plantation in Province of Bukidnon and Misamis Oriental areas through a growership program. As of the end of 2<sup>nd</sup> Quarter of 2023, about 3,699.085 (gross area) hectares were already acquired for development in this region, of which almost 1,547.96 hectares were planted while about 2,652.62 hectares total area potential for planting. The company is anticipating the signing of agreements with local communities in Misamis Oriental and Bukidnon interested for its expansion program aggregating to 2,000 hectares. Due to the synergy and tax efficiency, ABERDI and Nakeen Corp. have applied for an Amended Articles and Plan of Merger as approved by its Board of Directors and shareholders.

The Company is also looking to pursue further growth opportunities in the Group's palm oil business in Surigao and Agusan region. Surigao Greens Agri Corp. (SGAC), a newly incorporated subsidiary of A Brown Company, has executed an Asset Purchase Agreement consisting of several parcels of land with total land area of Seventy Thousand (70,000) square meters and a Palm Oil Milling Plant located in Tambis, Barobo, Surigao del Sur. The Palm Oil Milling Plant consists of a factory building and machineries with a rated capacity of 10 metric tons (MT) per hour. The purchase of the Palm Oil Milling Plant in Surigao del Sur will allow access to an existing and operational and cost-efficient crude palm oil milling plant that is able to source palm oil fresh fruit bunches from nearby plantation farms in the region (Surigao and Agusan).

ABERDI's refinery with fractionation machine is now operational in full capacity of 50 MT/day. Likewise, the company is producing Palm Olein, Palm Stearin and Palm Fatty Acid Distillate in bulk sales. In 2016, it has already engaged in branding and packaging of premium cooking oil labelled as "Golden Belle". Its products are now FDA and HALAL-certified.

The company's strategic Route to Market design is divided into two (2) service packages. First service package is direct serve outlets which will cover industrial or food processing companies, supermarkets, hyper-marts, wholesalers, groceries, catering services, hotels and restaurants around Mindanao region. Second service package will be indirect serve outlets like sari-sari stores, traditional food outlets, mini marts, direct household consumptions or specials events markets will serve by our potential Trade Execution Partners (TRP). This Dealership System has good functional discounts plus variable incentive scheme. This will provide customers and consumers excellent service and good margin to the best quality products.

## **PROSPECTS OF POWER GENERATION:**

### **Vision**

The promotion of sustainable energy is the top of the current administration's agenda for the power industry. This vision emphasizes the re-evaluation of new sources of energy as needed by the country, including nuclear energy, solar, and other clean energy to fight against climate change.

At present, the country is still on its quest to obtain energy security and equity, considering the affordability and access of electric supply. Though it was acknowledged by the current administration acknowledged that there is a power supply dilemma hounding the country, the Philippine Power System remained generally stable and that the DOE will ensure the sustainable implementation of the rules and laws for the security of our energy supply through competition, access to bilateral markets, anti-monopoly measures, least-cost power, and the protection of the environment.

### **Demand and Forecast**

Increase in energy demand is expected from the distinct growth in the industrial, commercial, and domestic sectors of the country. In addition, electrification continues—households in areas such as parts of Mindanao and Mindoro, which are not fully grid-connected, are likely to gain better access to electricity supply in the coming years with the target to reach 100% electrification across the Philippines by 2022.

By 2040, the country's electricity demand is projected to grow by about 5% annually. And to meet this demand including reserve requirements, a total of 43,765 MW additional capacities must come online.

Peak electricity demand is predicted at 12,285 megawatts (MW) for Luzon; 2,519 MW for Visayas and 2,278 MW for Mindanao, for 2020, according to DOE.

With the additional 237MW on 2017—comprising of 63% coal, 33% solar, and 4% oil-based sources, the energy department is expecting that enough power reserves will meet the demand. In addition, 19,934 MW of capacity is still under development with committed and "indicative" projects until 2025.

Adequate power supply across all three grids—Luzon, Visayas, Mindanao, is forecasted assuming that nothing deviates from the projections based on planned outages, the maintenance program, and the historical peaks and these projected rise in demand by DOE.

### **Solutions**

To solve the country's energy security woes, DOE initiated the issuance of policies for resiliency, conducted of performance assessment and technical audit for all energy facilities, and reactivated the Inter-Agency Task Force on Securing Energy Facilities, among others.

DOE also called for the full cooperation of all industry stakeholders in monitoring and responding to the power demand-supply situations, they also encourage consumers to practice energy efficiency and conservation measures.

### **Coal Power Generation**

Coal makes up a significant chunk of the country's power supply mix. In 2020, coal-run plants contributed to 57% of the country's power generation output, while gas plants made up 19.2%, according to the latest Philippine Energy Plan.

According to forecasts, the share of coal power plants will increase from about 30% in 2010 to around 50% in 2030. This share will further increase to 65% by 2050 since the existing natural gas plants are retired in the future. Over 25% of 2050 capacity will be diesel. It is also assumed that all of electricity demand will be supplied through electricity grids in which plants are dispatched to minimize variable costs.

In conclusion, energy remains a crucial element in economic growth and development of any country. According to the National Economic and Development Authority (NEDA), the potential of the Philippines of reaching high-income status by 2040 provided the economy grows consistently by 7.0 percent annually.

Meanwhile, the Philippines scored 4.2 out of 7 in terms of sufficiency and reliability of power supply, as showed in a World Economic Forum report, and still showing great probability of improvement in the energy industry. Strong coordination among energy stakeholders, coupled with the additional power generation capacities, are paving way in responding to the challenges of the industry.

## **Plan of Action**

### **Coal-Fired Power Project:**

As economic activities continue to expand in the Visayas, specifically in Panay, a need for a more stable and sufficient power supply situation is a must. The 2 x 135 MW coal-fired power plant project in Concepcion, Iloilo was developed due to the foreseen power capacity requirements in the Visayas region. The first unit of this new base load plant was designed to address the power supply requirements of the Visayas grid and provide a steady flow of power when it goes on line. Palm Concepcion Power Corporation (PCPC), the project proponent, constructed the power plant in 2013. The power plant is equipped with a steam turbine generator manufactured by Alstom of Europe.

PCPC started commercial operations of the first unit of the 135 MW Circulating Fluidized Bed Combustion (CFBC) power plant on August 16, 2016. It was inaugurated by the Philippine President Rodrigo R. Duterte in Malacañang on November 28, 2016. It is now delivering power supply to Panay, Negros, and the rest of Visayas.

Nine (9) distribution utilities and electric cooperatives have signed up with PCPC for their base load power capacity requirements in order to deliver reliable and stable power generation supply to industrial, commercial, and residential consumers.

The power plant takes pride with the capability of its CFBC Technology and the sound environmental measures being practiced in the power plant as it maintained its excellent emission performance vis-a-vis the DENR standards.

At present, PCPC is fulfilling its purpose by serving the needs of its customers, helping ensure that homes and businesses have dependable and uninterrupted power supply, which they can afford, as it continues to uphold its commitment to the environment and host communities.

### **Bunker-Fired Power Project:**

Peakpower Energy, Inc. (PEI) was set up in 2013 to implement projects designed to generate peaking energy across various A+/Green rated electric cooperatives in Mindanao. These are Build-Operate-Transfer agreements for brand new bunker-fired engines, which will last for 15 years.

After signing a Power Purchase and Transfer Agreements for 20-megawatt of peaking power supply with South Cotabato II Electric Cooperative (SOCOTECO II) and 5-megawatt supply with Agusan del Sur Electric Cooperative (ASELCO) in 2013, the respective plants Peakpower Soccsargen, Inc. (PSI) and Peakpower San Francisco, Inc. (PSFI) are commercially operational, supplying the very much needed power capacities in their franchise areas.

Expansion of these two plants were also completed and has already declared their commercial operations last September 2017 and January 2018, respectively. A third plant, Peakpower Bukidnon, Inc. (PBI) which is a 2 x 5.2MW peaking plant and embedded to Bukidnon Second Electric Cooperative (BUSECO) declared commercial operations on March 2018, and was inaugurated a year after.

Recently, PEI officially appointed Wartsila Philippines Inc., a leading supplier of power solutions in the country, to operate the mobilization and maintain the facilities of PEI's three diesel power plants in Mindanao. On October 11, 2019, PEI and Wartsila Philippines Inc. signed an operations and maintenance contract agreement for all its three power plants.

### **Irradiation and Cold Storage Services Project:**

#### **Irradiation Solutions Inc. – 100% owned by ABCI**

In January 2021, the Securities and Exchange Commission (SEC) approved the incorporation of the ABCI's new subsidiary, **Irradiation Solutions, Inc. (ISI)**. ISI is developing the-Tanay E-Beam and Cold Storage Facility. The project is envisioned to be the first Commercial E-Beam Facility to be built in the Philippines.

The E-Beam Facility will be able to provide services for the sterilization of medical masks, dressings, syringes and surgical staplers and a wide among application for single-use medical devices. The facility will be able to provide commercial irradiation services to improve the quality of agricultural and fishery products. This will enable local products, fruits, and seafood to be of export quality and gain wider access to international markets. The E-Beam technology is used in more than 60 countries and is considered the most economical alternative among available commercial sterilization methods.

The Board of Investments (BOI) has granted approval for the project as Pioneering status under the Republic Act No. 11534 or the Corporate Recovery and Tax Incentives for Enterprises (CREATE) Act. The project has secured all necessary approvals and permitting required for construction.

The Tanay E-Beam and Cold Storage Facility is currently under construction and is expected to provide services beginning January 2024.

### **Natural Gas Power Plant Project:**

#### **Vires Energy Corporation –100% owned by ABCI**

ABCI acquired 99.995% of the outstanding capital of **Vires Energy Corporation (“VEC”)** from Argo Group Pte. Ltd. of Singapore in June 2020. It was incorporated on March 11, 2015 with SEC Registration No. CS201504660. In March 2023, ABCI acquired the remaining 0.005% of the shares of VEC, thus, increasing its ownership to 100%.

VEC was incorporated in 2015 and is the proponent of the Integrated Floating LNG Storage and Regasification Terminal and a 500MW Floating Natural Gas-Fired Power Plant Project located in Barangay Simlong, Batangas City. Unlike the conventional land-based facility, the Project will use a Floating Power Plant (FPP) or power barge.

The Environmental Compliance Certificate (ECC) and Board of Investments registration for fiscal incentives has been secured for both the Floating Power Plant and the LNG Terminal components of the project. The Department of Energy Issued a Notice to Proceed (NTP) in April 2021 for the LNG Storage and Regasification Terminal component.

The Pre-Front End Engineering Design Phase (Pre-FEED) for the marine and onshore facilities and the floating power plant conducted by Seanergy Singapore and London Marine Consultants was completed in October 2021 and April 2022, respectively. The Front End Engineering Design (FEED) phase of the facilities is

ongoing. VEC has secured the project site in Barangay Simlong, Batangas City. The property will be developed to include the power barge mooring area or jetty, switchyard, onshore facilities and the balance of plant infrastructure.

Vires Energy is currently seeking a long-term gas supply contract and base load power off-take agreements. The power plant project is in a position to be in commercial operations by mid-2026.

## **Renewable Energy Projects:**

### **Hydro Link Projects Corporation (HLPC) - 100% owned by ABCI**

Hydro Link Projects Corporation (“HLPC”) is a wholly-owned subsidiary of ABCI focused on renewable energy development. HLPC is a registered renewable energy developer with the Department of Energy. HLPC will be ABCI’s vehicle to pursue renewable energy projects. HLPC remains on the lookout for opportunities at any stage of development from greenfield opportunities to acquisition of operating power projects.

## **Bulk Water Supply Projects:**

### **AB Bulk Water Company, Inc. (ABWCI) - 100% owned by ABCI**

AB Bulk Water Company, Inc. (ABWCI) was incorporated on March 31, 2015 to engage in the business of holding and providing rights to water, to public utilities and cooperatives or in water distribution in the Municipality of Opol or to engage in business activities related to water development.

ABWCI is currently pursuing the proposed Bulk Water Supply Project for the Municipality of Opol in Misamis Oriental. The Project will tap the water resources of Lumayagan River and aims to supply about 40 million liters per day (MLD) of potable water to cater the present and future requirements of the municipality. Other potential service areas include the neighboring municipalities of Opol – the expanding water needs of Cagayan de Oro City, the city of El Salvador, and the municipalities of Alubijid, Laguindingan, and Gitagum.

The detailed engineering design of the Project has been completed confirming the technical viability of the project as defined during the pre-feasibility study. The Water Permit has already been granted by the National Water Resources Board (NWRB). Likewise, the Environmental Compliance Certificate (ECC) has been secured from the Department of Environment and Natural Resources (DENR). The Watershed Management Study was also completed with the involvement of different LGU sectors and stakeholders.

The project will follow a business model to which it will provide potable water through a bulk supply agreement with a distribution company. ABWCI has been in discussion with numerous possible investors, partners and off-takers. However, no final agreement has been successful completed pending their due diligence on project parameters.

ABWCI remains steadfast to serve the needs for potable water of the LGU within the Cagayan de Oro – Iligan corridor more particularly the possibility of providing water to Cagayan de Oro Water District (COWD), a local water distribution company and as a possible off-taker of the project, which strongly indicates a worthy partnership considering the current scarcity of potable water supplying the franchise area of COWD. In preparation for this undertaking the Company is looking at the potential of Cagayan de Oro River in Municipality of Talakag as possible water sources.

The demand for water is increasing in the regions the ABWCI is focusing on. The Company continues to do pre-development work towards reaching shovel-ready status.

## **Infrastructure Projects:**

### **Blaze Capital Limited – 100% owned by ABCI**

Blaze Capital Limited is a British Virgin Islands company, incorporated and registered on August 8, 2011. It was acquired by ABCI on May 22, 2017. BCL has a 33.33% ownership in East West Rail Transit Corporation (EWRTC) which is part of a consortium for the East-West Railway Project under the unsolicited track of the Build-Operate-Transfer (BOT) Law.

The Consortium, composed of EWRTC and Alloy MTD Group (represented by MTD Philippines Inc.), submitted an unsolicited proposal to the Philippine National Railways to finance, build and then operate and maintain the East West Rail Project. The East-West Rail Project is an integrated light rail mass transportation system and is intended to help alleviate the gap in the transportation infrastructure in the metropolis. It will traverse the corridor of Quezon Avenue in Quezon City and España Boulevard in the City of Manila. This project is in line with the objective of the government to provide the most efficient and appropriate solution/system to address the large volume of commuters in Metro Manila and other major urban cities. The Project will involve the development, design, construction, supply, completion, testing, commissioning, and the operation & maintenance of the East-West Rail Project.

The Consortium has completed and submitted to PNR and to NEDA thru PNR the pertinent project documents that would satisfy the latest ICC requirements including the Environmental Impact Statement (EIS). These submissions will help facilitate the evaluation and approval of the project. The remaining requirement to be submitted is the Regional Development Council's (RDC) endorsement, which can be obtained simultaneously during the NEDA approval stage.

The Consortium has already sought endorsement from the respective hosts LGUs' (Manila and Quezon City) and the No Objection Clearance, in support to their previous no objection in 2017 (Manila) and 2018 (Quezon City). This will support to move forward with the RDC endorsement. Quezon City LGU already sent their letter of support to PNR through a letter dated 7 January 2021.

To date, the Consortium is waiting for the NEDA's evaluation of the project which schedule may have been affected because of the current pandemic situation.

### **Joint Venture with GET Philippines on ABC Electric Shuttle Service**

On February 21, 2023, the Board of Directors of A Brown Company, Inc. ("**ABCI**") has authorized the Corporation to enter into a joint venture with GET Philippines, Inc. ("**GET**") to create, promote, operate and manage the ABC Electric Shuttle Service as a clean, efficient, modern and green mass transport system in Cagayan de Oro ("**the Project**").

GET will incorporate and set up a new company ("**JV Co.**") to be jointly owned with ABCI for the purpose of initially owning ten (10) Community Optimized Managed Electric Transport (COMET) electric vehicles that will be deployed for the Project.

Upon incorporation of JV Co., the outstanding capital stock will be Forty-Five Million Pesos (Php45,000,000.00) corresponding to Forty-Five Million (45,000,000) shares and GET will own 100% of the outstanding capital stock of JV Co.

GET will transfer ownership of Twenty-Two Million Five Hundred Thousand (22,500,000) shares in JV Co. to ABCI immediately upon issuance of the Forty Five Million (45,000,000) shares in JV Co. to GET. ABCI will pay to GET Twenty Two Million Five Hundred Thousand Pesos (₱22,500,000.00) as advance payment for the Shares of GET in JV Co. that ABCI will acquire from GET which will be equivalent to 50% equity ownership in JV Co.

The JV Co. will be responsible for the provision, management, service, maintenance, and operation of the fleet of COMET electric vehicles for the ABC Electric Shuttle Service in Cagayan de Oro. The JV Co. will

also offer the COMET electric vehicles as an effective marketing tool and platform for media and transit advertising for third parties. It shall make use of the GETPASS Transport Ecosystem as a fleet and passenger management and monitoring system for the ABC Electric Shuttle Service.

(MCPI) has secured the approval of the Securities and Exchange Commission (SEC) on the shortening of its corporate term from fifty (50) years from and after the date of incorporation to seventeen years (17) years from and after the date of issuance of the Certificate of Incorporation, or on 3 July 2024.

### **Impact of Economic/Political Uncertainties:**

The Company's performance will continue to hinge on the overall economic performance of the country. Interest rate movements may affect the performance of the real estate industry, including the Company. Good governance will definitely lead to better economy and better business environment and vice-versa. After the change of leadership as the result of the May 2022 National Elections, political stability encourages people to work better and spend more and the investors to infuse funds for additional investment. Given the other positive economic indicators like recovery in exports, sustained rise in remittances and growing liquidity in the domestic financial market, the government's projected growth targets are attainable.

The annual average headline inflation (2018=100) of the country for the year 2022 was 5.8%, way higher than the 2021 and 2020 average inflation rate of 3.9% and 2.4%, respectively. The 2018 rate was slightly lower at 5.2% as compared to the 2022 rate as the Philippine Statistics Authority (PSA) data showed.

Compared with their respective average inflation rates in 2021, the indices of the following commodity groups recorded higher annual mark-ups in 2022: transport, 12.9 percent; housing, water, electricity, gas and other fuels, 6.4 percent; food and non-alcoholic beverages, 5.9 percent; restaurants and accommodation services, 4.1 percent; Furnishings, household equipment and routine household maintenance, 3.2 percent; Personal care, and miscellaneous goods and services, 3.0 percent; clothing and footwear, 2.6 percent; recreation, sports and culture, 2.3 percent; and education services, 1.8 percent. On the contrary, average inflation during the year were slower in the indices of alcoholic beverages and tobacco at 7.9 percent; health at 2.6 percent; and financial services at 8.2 percent. The information and communication index maintained its 2021 average inflation of 0.6 percent.

Excluding selected food and energy items in the headline inflation, the average core inflation for 2022 was posted at 3.9 percent, while 3.0 percent in 2021.

For 2023, the Development Budget Coordination Committee (DBCC) expects inflation to gradually ease to 2.5 to 4.5 percent before returning to the target range of 2.0 to 4.0 percent in 2024. The BSP attributes the projected deceleration in inflation to three main factors—the expected easing in global oil and non-oil prices, the negative base effects from the transport fare adjustments in 2022, and the impact of BSP's cumulative policy rate adjustments. Inflation is expected to taper off in 2023 although upside risks remain. Likewise, monetary tightening that came as a response to curb inflation, is expected to drag economic growth. In previous years, the inflation target was an appropriate quantitative representation of the BSP's medium-term price stability goal that is conducive to the balanced and sustainable growth of the Philippine economy.

The BSP Governor believed that continued and effective implementation of direct non-monetary interventions and policy reforms to alleviate supply constraints remains crucial in keeping the trajectory of inflation within the target band.

Nevertheless, the BSP is closely monitoring developments and challenges brought about by the pandemic to ensure that the monetary policy stance remains consistent with its price and financial stability objectives.

As part of the 8-point Socioeconomic Agenda of the Marcos Administration and as laid out in the Philippine Development Plan (PDP) 2023-2028, the government will continue to prioritize addressing the impact of inflation as it remains to be a challenge not only in the country, but throughout the globe. NEDA Secretary Arsenio M. Balisacan likewise noted the timely decision of President Ferdinand R. Marcos, Jr. to extend the validity of the reduced import rate duties on various products such as pork, rice, corn, and coal until December 2023.

The Philippine economy grew by 7.6 percent in 2022 exceeding the government's revised growth target of 6.5 to 7.5 percent for the year and was higher than the 5.6 percent growth in 2021. The 2022 GDP growth was the highest since 1976. This was also a reverse from 2020 that shrank the economy by 9.5%, the worst contraction since 1946 and sharpest among the largest economies of Asia-Pacific due to uncontrolled COVID-19 outbreak combined with strict nationwide lockdowns and mobility restrictions, a succession of natural disasters, and delays in budget execution which weighed on public investment. The contraction in 2020 was the low end of the -8.5 to -9.5 percent estimate of the Development Budget and Coordination Committee (DBCC) in light of the lingering public health crisis.

The growth was seen faster and expected despite the COVID-19 since the country is already transitioning towards returning to the pre-pandemic "normal" with restrictions on mobility continually being eased. The sectors which contributed the most to the growth were wholesale and retail trade, repair of motor vehicles and motorcycles, manufacturing and construction.

The NEDA Chief said that the PH economy's growth remains robust as the government continues to intensify its efforts to restore the economy to its high-growth trajectory, creating more and better-quality jobs & speeding up poverty reduction. The pandemic risk management and the easing of mobility restrictions have created a positive economic outlook, boosting economic activity and creating more jobs despite external headwinds. The resumption of face-to-face classes, the boost in the activities of small and large enterprises alike, and the resurgence of local tourism causing ripple effects towards the recovery of all the other sectors affected by the pandemic. The growth in domestic demand was met by expansion in the services and industry sectors, with production in most sub-sectors back to their pre-pandemic levels, adding the economic growth came with more jobs, resulting in "vibrant labor market conditions," with the country's unemployment rate down. In terms of the volumes of economic activity for many sectors, we have recovered already, but some others, particularly in the trade, tourism (have yet to recover).

For 2023, the government targets 6 to 7 percent GDP growth slower than the 7.6% uptick in 2022 due to the expected slowdown of the global economy. The forecast is an optimistic outlook despite headwinds. The country's bustling manufacturing sector, record-low unemployment, and stable and resilient banking system can alleviate buffers against external headwinds and indicate a resilient economy.

To achieve these goals, there are risks that lie ahead. Extreme weather disturbances like global warming and strong typhoons will be the biggest roadblock. The agriculture sector challenge is to make it resilient to such shocks. Reducing the cost of food, especially of rice, is important in reducing poverty. At the same time, there's need to raise productivity in the agricultural sector by helping farmers transition to higher value crops and making technology easily accessible. Other potential downside risks also include greater volatility in capital flows, and geopolitical risks and global pandemic. Thus, the government needs to remain vigilant and consider potential repercussions to the Philippine economy.

There's a need as well to nurture entrepreneurship and attract investments to produce higher-paying, higher quality jobs especially outside of Metro Manila. In turn, such investments will require a truly secure and stable economic and political environment. Moreover, the sectors should be resilient and diversified in both of products and markets, in particular, championing innovation and diversification in the industry sector. In the services sector, there is a need for a policy environment that makes it easier for firms to set up and operate businesses, as well as to comply with regulations. The government also needs to make the regulatory system much more efficient and transparent.

## **COVID-19 Global Health Crisis**

However, health crisis that became pandemic will certainly have tremendous impact on the economy.

After the spread of COVID-19 led to the lockdown of the entire island of Luzon, which accounts for 73 percent of the country's GDP, economic managers were not so optimistic of its impact.

The government has adopted measures including the relaxation of regulation for those affected by the epidemic, utilized programs providing unemployment/sickness benefits and established strategic commodities inventory, among others. The Socioeconomic Planning Office recommended in preparing the economy for a rebound by taking advantage of the situation and boosting infrastructure, rehabilitate the ecosystem, craft local government tourism master plans and the upgrading of facilities by the private sector. Additional suggestions include promoting domestic tourism by developing a new campaign for domestic travel, the provision of retooling measures like livelihood training, encouraging strategic investments in the field of medicine and the establishment of a Center for Disease Control-like network.

To combat the COVID-19 pandemic in the country, the President signed into law the Bayanihan to Heal as One Act (RA 11469) which was effective on March 25, 2020 and valid for three months unless extended by Congress. The law would allow the President to "reallocate, realign, and reprogram" a budget of almost ₱275 billion (\$5.37 billion) from the estimated ₱438 billion (\$8.55 billion) national budget approved for 2020, in response to the pandemic; enable him to "temporarily take over or direct the operations" of public utilities and privately owned health facilities and other necessary facilities "when the public interest so requires" for quarantine, the accommodation of health professionals, and the distribution and storage of medical relief; and "facilitate and streamline" the accreditation of testing kits.

After the expiry of Bayanihan to Heal as One Act (Bayanihan I) law on June 25, 2020, Bayanihan to Recover as One Act (Bayanihan II) was signed into law which provides for a PHP165.5-billion fund to finance the country's response and recovery interventions intended to mitigate the impact of the coronavirus disease 2019 (Covid-19) pandemic and also grants special powers anew to the President to best deal with the pandemic. Bayanihan II was considered crucial in government's efforts to gradually re-open the economy, support businesses and revitalize growth to make the country resilient to Covid-19 by strengthening the health sector, particularly the healthcare capacity and pandemic response.

### **Amendment to Articles of Incorporation and By-Laws**

#### *Reclassification of Unissued Common Shares to Preferred Shares*

On April 12, 2021 and June 24, 2021, the BOD and shareholders representing at least 2/3 of the outstanding capital stock, respectively, approved the proposal to amend the Parent Company's AOI to create preferred shares by reclassifying its authorized capital stock from the from the current Three Billion Three Hundred Million Pesos (₱ 3,300,000,000.00) divided into Three Billion Three Hundred Million (3,300,000,000) Common Shares to Three Billion Three Hundred Million Pesos (₱ 3,300,000,000.00) divided into Three Billion Two Hundred Fifty Million Pesos (₱ 3,250,000,000) divided into Three Billion Two Hundred Fifty Million (3,250,000,000) Common Shares and Fifty Million Pesos (₱ 50,000,000) divided into Fifty Million (50,000,000) Preferred Shares. The reclassification of the Unissued Common Shares to create Preferred Shares will provide flexibility for the Group with respect to its prospective capital raising activities. On October 5, 2021, the SEC approved the said amendment to the AOI.

The provision of the amendment of Article VII of the Parent Company's AOI including the description of the different classes of stock of the Corporation and a statement of the designations and powers, preferences and rights, and conversions, limitations, or restrictions thereof, in respect of each class of stock can be gleaned in the Company's website (under Our Company/Articles of Incorporation and By-Laws).

## **Preferred Shares Offering – Registration, Issuance and Listing**

On May 25, 2021, the BOD approved the offering and issuance of cumulative, non-voting, non-participating, non-convertible, peso-denominated perpetual preferred shares out of the authorized but unissued capital of the Corporation, with an aggregate issue amount of up to One Billion Five Hundred Million Philippine Pesos (₱1,500,000,000.00) to be registered with the Securities and Exchange Commission and listed on the Philippine Stock Exchange, Inc.

The preferred shares offering and issuance were subject to the SEC's approval on the Parent Company's amendment to the AOI approved by the BOD and shareholders on April 12, 2021 and June 24, 2021, respectively, to create preferred shares by reclassifying its authorized capital stock. On July 19, 2021, the Company filed with SEC the Registration Statement for the shelf registration of the preferred shares.

On 15 October 2021, the SEC issued the Certificate of Filing of Enabling Resolution dated 14 October 2021 in connection with the offer and issue of 50,000,000 cumulative, non-voting, non-participating, and non-convertible perpetual preferred shares, at an offer price of up to Php100.00 per share which was approved by the Board of Directors of the Company on July 15, 2021 and was filed with the SEC pursuant to Section 6 of the Revised Corporation Code of the Philippines (R.A. No. 11232).

The Parent Company received a "Pre-effective letter" dated 22 October 2021 on the same day issued by the SEC which confirmed that it favorably considered the Company's Registration Statement in relation to the Company's proposed shelf registration subject to compliance by the Company with the conditions prescribed in the Pre-effective letter.

On 10 November 2021, the Parent Company secured approval from the Philippine Stock Exchange (PSE) for the shelf-listing of up to 50 million preferred shares and the follow-on public offer of up to 15 million preferred shares. For the first tranche, A Brown will offer 10 million preferred shares at an offer price of P100 per share or P1B worth with an oversubscription option of up to 5 million preferred shares worth P500 million. On 11 November 2021, A Brown approved the preferred shares offering with an initial dividend rate of 7.0% p.a. to be paid quarterly.

On 12 November 2021, the Company received from the Securities and Exchange Commission (SEC):

- (i) SEC MSRD Order No. 76 s. 2021 ("Order of Registration") for the shelf registration of up to 50,000,000 cumulative, non-voting, non-participating, non-convertible, and redeemable perpetual Preferred Shares of which the Initial Offer Shares are a part, dated 12 November 2021; and
- (ii) Permit to Offer Securities for Sale ("Permit to Sell") covering the Initial Offer Shares, dated 12 November 2021.

On November 29, 2021, there were 13,264,900 "Series A" preferred shares that were issued and listed in the Philippine Stock Exchange with "BRNP" as its ticker symbol.

The Corporation designated and appointed PNB Capital and Investment Corporation as the sole issue manager.

The Parent Company may offer from time to time, in one (1) or more tranches in such amounts/issue price and under such terms and conditions as may be determined by Corporation in light of prevailing market and other conditions at the time of sale.

For further information, kindly refer to the Prospectus and Offer Supplement dated November 11, 2021 (including the Order of Registration and Permit to Sell issued by the SEC) with regard to "Series A" preferred shares offering which are accessible through the Company's website (under Investor Relations/Prospectus).

## Uses of Proceeds from “Series A” Preferred Shares Offering

For the year ending December 31, 2022, the proceeds of the Preferred Stocks Offering – Series A of 13.2649 million shares of A Brown Company, Inc. (BRNP) listed on November 29, 2021 were applied as follows:

In Php Millions

## **REPORT ON REVIEW OF INTERIM CONDENSED CONSOLIDATED FINANCIAL STATEMENTS**

The Board of Directors and Stockholders  
A Brown Company, Inc.  
Xavier Estates Uptown, Airport Road  
Balulang, Cagayan de Oro City

### **Introduction**

We have reviewed the accompanying unaudited interim condensed consolidated financial statements of A Brown Company, Inc. and its subsidiaries (collectively referred to as “the Group”), which comprise the interim consolidated statement of financial position as at June 30, 2023, and the related interim consolidated statements of comprehensive income, changes in equity and cash flows for the six-month periods ended June 30, 2023 and 2022, and a summary of significant accounting policies and other explanatory notes. Management is responsible for the preparation and fair presentation of these interim condensed consolidated financial statements in accordance with Philippine Accounting Standards (PAS) 34, *Interim Financial Reporting*, as modified by the application of the financial reporting reliefs issued and approved by the Securities and Exchange Commission (SEC), as described in Note 2 to the interim condensed consolidated financial statements. Our responsibility is to express a conclusion on these interim condensed consolidated financial statements based on our review.

### **Scope of Review**

We conducted our review in accordance with Philippine Standard on Review Engagements 2410, *Review of Interim Financial Information Performed by the Independent Auditor of the Entity*. A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Philippine Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

### **Conclusion**

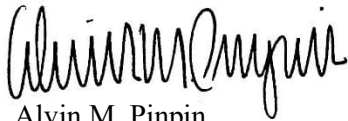

Based on our review, nothing has come to our attention that causes us to believe that the accompanying interim condensed consolidated financial statements are not prepared, in all material respects, in accordance with PAS 34, as modified by the application of the financial reporting reliefs issued and approved by the SEC in response to the COVID-19 pandemic.

### **Emphasis of Matter - Basis of Preparation**

We draw attention to Note 2 of the interim condensed consolidated financial statements which indicates that the interim condensed consolidated financial statements have been prepared in accordance with PAS 34, as modified by the application of the financial reporting reliefs issued and approved by the SEC in response to the COVID-19 pandemic. The impact of the application of the financial reporting reliefs on the June 30, 2023 interim condensed consolidated financial statements are discussed in detail in Note 2. Our report is not modified in respect of this matter.

On February 11, 2023, the SEC has approved the incorporation of SGAC with an authorized share capital of ₱50.0 million divided into 50.0 million shares with a par value of ₱1.0 per share. The Parent Company has subscribed to 12,500,000 common shares representing one hundred percent (100%) of capital stock at incorporation.

### Approval of Interim Condensed Consolidated Financial Statements

The accompanying interim condensed consolidated financial statements of the Group as of June 30, 2023 and for the six months period ended June 30, 2023 and 2022 were approved and authorized for issue by the Board of Directors (BOD) on November 3, 2023.

---

## 2. **Basis of Preparation and Changes in Accounting Policies and Disclosures**

### Basis of Preparation

The accompanying interim condensed consolidated financial statements have been prepared using the historical cost basis, except for EIFVOCI that are carried at fair value. The interim condensed consolidated financial statements are presented in Philippine Peso (₱), which is the functional currency of the Parent Company. All subsidiaries and associates also use ₱ as functional currency, except for BCL whose functional currency is US Dollar (\$). All amounts are rounded off to the nearest Philippine Peso, except when otherwise indicated.

The interim condensed consolidated financial statements provide comparative information in respect of the previous period.

The interim condensed consolidated financial statements of the Group have been prepared for inclusion in the offering circular in relation to a planned capital raising activity.

### Statement of Compliance

The accompanying interim condensed consolidated financial statements of the Group have been prepared in accordance with Philippine Accounting Standard (PAS) 34, *Interim Financial Reporting*, as modified by the application of the following reporting reliefs issued and approved by SEC under Memorandum Circular No. 34-2020 in response to the COVID-19 pandemic:

- a. Assessing if the transaction price includes a significant financing component discussed in Philippine Interpretations Committee (PIC) Questions and Answers (Q&A) No. 2018-12-D;
- b. Treatment of land in the determination of percentage of completion (POC) discussed in PIC Q&A No. 2018-12-E.; and,
- c. Application of International Financial Reporting Interpretations Committee (IFRIC) Agenda Decision on Over Time Transfer of Constructed Goods (PAS 23, *Borrowing Cost*).

The interim condensed consolidated financial statements do not include all the information and disclosures required in the annual consolidated financial statements, and should be read in conjunction with the Group's annual consolidated financial statements as of and for the year ended December 31, 2022, which have been prepared in accordance with Philippine Financial Reporting Standards (PFRS), which include the availment of reliefs granted by the above SEC Memorandum Circular (MC).

The details and the impact of the adoption of the above financial reporting reliefs are discussed in the section below under Changes in Accounting Policies and Disclosures.

### Changes in Accounting Policies and Disclosures

The accounting policies adopted are consistent with those of the previous financial year, except that the Group has adopted the following new accounting pronouncements starting January 1, 2023. The Group has not early adopted any standard, interpretation or amendment that has been issued but is not yet effective.

Unless otherwise indicated, adoption of these new standards did not have an impact on the interim condensed consolidated financial statements of the Group.

The nature and impact of each new standards and amendment are described below:

- Amendments to PAS 1 and PFRS Practice Statement 2, *Disclosure of Accounting Policies*

The amendments provide guidance and examples to help entities apply materiality judgements to accounting policy disclosures. The amendments aim to help entities provide accounting policy disclosures that are more useful by:

- Replacing the requirement for entities to disclose their ‘significant’ accounting policies with a requirement to disclose their ‘material’ accounting policies, and,
- Adding guidance on how entities apply the concept of materiality in making decisions about accounting policy disclosures

The amendments to the Practice Statement provide non-mandatory guidance.

- Amendments to PAS 8, *Definition of Accounting Estimates*

The amendments introduce a new definition of accounting estimates and clarify the distinction between changes in accounting estimates and changes in accounting policies and the correction of errors. Also, the amendments clarify that the effects on an accounting estimate of a change in an input or a change in a measurement technique are changes in accounting estimates if they do not result from the correction of prior period errors.

- Amendments to PAS 12, *Deferred Tax related to Assets and Liabilities arising from a Single Transaction*

The amendments narrow the scope of the initial recognition exception under PAS 12, so that it no longer applies to transactions that give rise to equal taxable and deductible temporary differences.

The amendments also clarify that where payments that settle a liability are deductible for tax purposes, it is a matter of judgement (having considered the applicable tax law) whether such deductions are attributable for tax purposes to the liability recognized in the financial statements (and interest expense) or to the related asset component (and interest expense).

#### Standards Issued but Not Yet Effective

Pronouncements issued but not yet effective are listed below. Unless otherwise indicated, the Group does not expect that the future adoption of the said pronouncements will have a significant impact on its interim condensed consolidated financial statements. The Group intends to adopt the following pronouncements when they become effective.

#### *Effective beginning on or after January 1, 2024*

- Amendments to PAS 1, *Classification of Liabilities as Current or Non-current*

The amendments clarify:

- That only covenants with which an entity must comply on or before reporting date will affect a liability’s classification as current or non-current.

- That classification is unaffected by the likelihood that an entity will exercise its deferral right.
- That only if an embedded derivative in a convertible liability is itself an equity instrument would the terms of a liability not impact its classification

The amendments are effective for annual reporting periods beginning on or after January 1, 2024 and must be applied retrospectively. The Group is currently assessing the impact the amendments will have on current practice and whether existing loan agreements may require renegotiation.

- Amendments to PFRS 16, *Lease Liability in a Sale and Leaseback*

The amendments specify how a seller-lessee measures the lease liability arising in a sale and leaseback transaction in a way that it does not recognize any amount of the gain or loss that relates to the right of use retained.

The amendments are effective for annual reporting periods beginning on or after January 1, 2024 and must be applied retrospectively. Earlier adoption is permitted and that fact must be disclosed.

*Effective beginning on or after January 1, 2025*

- PFRS 17, *Insurance Contracts*

PFRS 17 is a comprehensive new accounting standard for insurance contracts covering recognition and measurement, presentation and disclosure. Once effective, PFRS 17 will replace PFRS 4, *Insurance Contracts*. This new standard on insurance contracts applies to all types of insurance contracts (i.e., life, non-life, direct insurance and re-insurance), regardless of the type of entities that issue them, as well as to certain guarantees and financial instruments with discretionary participation features. A few scope exceptions will apply.

The overall objective of PFRS 17 is to provide an accounting model for insurance contracts that is more useful and consistent for insurers. In contrast to the requirements in PFRS 4, which are largely based on grandfathering previous local accounting policies, PFRS 17 provides a comprehensive model for insurance contracts, covering all relevant accounting aspects. The core of PFRS 17 is the general model, supplemented by:

- A specific adaptation for contracts with direct participation features (the variable fee approach)
- A simplified approach (the premium allocation approach) mainly for short-duration contracts

On December 15, 2021, the FRSC amended the mandatory effective date of PFRS 17 from January 1, 2023 to January 1, 2025. This is consistent with Circular Letter No. 2020-62 issued by the Insurance Commission which deferred the implementation of PFRS 17 by two (2) years after its effective date as decided by the IASB.

PFRS 17 is effective for reporting periods beginning on or after January 1, 2025, with comparative figures required. Early application is permitted.

*Deferred effectivity*

- Deferral of Certain Provisions of PIC Q&A 2018-12, PFRS 15 Implementation Issues Affecting the Real Estate Industry (as amended by PIC Q&As 2020-02 and 2020-04)

On February 14, 2018, the PIC issued PIC Q&A 2018-12 which provides guidance on some PFRS 15 implementation issues affecting the real estate industry. On October 25, 2018 and February 8, 2019, the SEC issued MC No. 14-2018 and MC No. 3-2019, respectively, providing reliefs to the real estate industry by deferring the application of certain provisions of this PIC Q&A for a period of three years until December 31, 2020. On December 15, 2020, the SEC issued MC No. 34-2020 which further extended the deferral of certain provisions of this PIC Q&A until December 31, 2023 as follows:

- a. Assessing if the transaction price includes a significant financing component as discussed in PIC Q&A 2018-12-D (as amended by PIC Q&A 2020-04)
- b. Treatment of land in the determination of the POC discussed in PIC Q&A 2018-12-E

To assist real estate companies to finally adopt the said PIC and IFRIC pronouncements and enable them to fully comply with PFRS 15 and revert to full PFRS, the Commission en banc, in its meeting held on July 8, 2021, approved the amendment to the transitional provisions in the above MCs which would provide real estate companies the accounting policy option of applying either the full retrospective approach or modified retrospective approach when they apply the provisions of the PIC and IFRIC pronouncements.

The Group availed of the SEC reliefs to defer the above specific provisions of PIC Q&A No. 2018-12. Had these provisions been adopted, the Group assessed that the impact would have been as follows:

- a. The mismatch between the POC of the real estate projects and right to an amount of consideration based on the schedule of payments provided for in the contract to sell (CTS) might constitute a significant financing component. In case of the presence of significant financing component, the guidance should have been applied retrospectively and would have resulted in restatement of prior year financial statements. Adoption of this guidance would have impacted interest income, interest expense, revenue from real estate sales, installment contracts receivable (ICR), provision for deferred income tax, deferred income tax asset or liability for all years presented, and the opening balance of retained earnings. The Parent Company has yet to assess if the mismatch constitutes a significant financing component for its CTSs.
- b. The exclusion of land in the determination of POC would have reduced the POC of real estate projects. Adoption of this guidance would have reduced revenue from real estate sales, cost of sales and ICR; increased real estate inventories and would have impacted deferred income tax asset or liability and provision for deferred income tax for all years presented, and the opening balance of retained earnings.

The above would have impacted the cash flows from operations and cash flows from financing activities for all years presented.

- IFRIC Agenda Decision on Over Time Transfer of Constructed Goods (PAS 23, *Borrowing Cost*)

In March 2019, IFRIC published an Agenda Decision on whether borrowing costs can be capitalized on real estate inventories that are under construction and for which the related revenue is/will be recognized over time under paragraph 35(c) of PFRS 15, *Revenue from Contracts with Customers*. IFRIC concluded that borrowing costs cannot be capitalized for such real estate inventories as they do not meet the definition of a qualifying asset under Philippine Accounting Standards (PAS) 23, *Borrowing Costs*, considering that these inventories are ready for their intended sale in their current condition.

On February 11, 2020, the Philippine SEC issued Memorandum Circular No. 4-2020, providing relief to the Real Estate Industry by deferring the mandatory implementation of the above IFRIC Agenda Decision until December 31, 2020. Further, on December 15, 2020, the Philippine SEC issued SEC MC No. 34-2020, which extends the relief on the application of the IFRIC Agenda Decision provided to the Real Estate Industry until December 31, 2023. Effective January 1, 2024, the Real Estate Industry will adopt the IFRIC agenda decision and any subsequent amendments thereto retrospectively or as the SEC will later prescribe. A real estate company may opt not to avail of the deferral and instead comply in full with the requirements of the IFRIC Agenda Decision.

The Group opted to avail of the relief as provided by the SEC. Had the Parent Company adopted the IFRIC agenda decision, borrowing costs capitalized to real estate inventories related to projects with pre-selling activities should have been expensed out in the period incurred.

- Amendments to PFRS 10, *Consolidated Financial Statements*, and PAS 28, *Sale or Contribution of Assets between an Investor and its Associate or Joint Venture*

The amendments address the conflict between PFRS 10 and PAS 28 in dealing with the loss of control of a subsidiary that is sold or contributed to an associate or joint venture. The amendments clarify that a full gain or loss is recognized when a transfer to an associate or joint venture involves a business as defined in PFRS 3. Any gain or loss resulting from the sale or contribution of assets that does not constitute a business, however, is recognized only to the extent of unrelated investors' interests in the associate or joint venture.

On January 13, 2016, the Financial Reporting Standards Council deferred the original effective date of January 1, 2016 of the said amendments until the International Accounting Standards Board (IASB) completes its broader review of the research project on equity accounting that may result in the simplification of accounting for such transactions and of other aspects of accounting for associates and joint ventures.

These amendments do not have any impact on the parent company financial statements.

#### Significant Accounting Judgment, Estimates and Assumptions

Judgments, key assumptions concerning the future, and other key sources of estimation uncertainty at the end of the reporting period, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next reporting period are consistent with those applied in the most recent annual financial statements.

### 3. Cash

Less allowance for credit losses	<b>10,714,030</b>	7,805,537
	<b>₱344,684,667</b>	₱267,890,499

ICR consists of accounts collectible in equal monthly installments with various terms up to a maximum of two years, and bear interest ranging from 14% to 18% in 2023 and 2022, depending on the project and units. The transfer certificates of title remain in the possession of the Group until full payment has been made by the customers. Interest earned from contract assets and ICR amounted to ₱0.8 million and ₱1.3 million as of June 30, 2023 and December 31, 2022, respectively.

Dividend receivable pertains to the cash dividends declared by the associates, PCPC and PEI, which are due and demandable.

Trade receivables include receivables from water service and sale of palm oil and other palm products which are noninterest-bearing and are normally collected within seven (7) to sixty (60) days.

In 2023, the Group assigned accounts receivable with recourse as collateral with its short-term loan discounting agreement with a bank. The outstanding balance of the assigned accounts receivable amounted to ₱160.2 million as of June 30, 2023 (see Note 12).

Advances to officers and employees pertain to salary and other loans granted to the Group's employees that are collectible through salary deduction. These are noninterest-bearing and are due within one year.

Other receivables pertain to advances made to homeowners' association of one of the projects and nontrade receivables. These receivables are noninterest-bearing and are due within one (1) year.

Movement in the allowance for impairment is as follows:

	<b>June 30, 2023</b>	December 31, 2022
	<b>(Unaudited; Six Months)</b>	(Audited; One Year)
Balances at beginning of year	<b>₱7,805,537</b>	₱6,094,110

<b>Balances at end of year</b>	<b>₱10,714,030</b>	<b>₱7,805,537</b>

*Receivables from related parties*

Receivable from related parties pertains to cash advances of the Group's associates, PEI and EWRTC, that are settled in cash. These are noninterest-bearing and are due and demandable.

As of June 30, 2023, the outstanding receivable from PEI, which was classified under "Receivable from related parties" in the consolidated statement of financial position amounting to ₱56.9 million on December 31, 2022, has been collected and settled. Receivable from EWRTC amounted to ₱49.4 million and to ₱49.9 million as of June 30, 2023 and December 31, 2022, respectively.

## 5. Real Estate Inventories

<b></b>	<b>₱3,375,743,886</b>	<b>₱2,961,366,258</b>

The real estate inventories are carried at cost. No real estate inventories are recorded at amounts lower than cost as of June 30, 2023 and December 31, 2022.

Land for sale and development represents real estate subdivision projects in which the Group has been granted License to Sell (LTS) by the Department of Human Settlements and Urban Development. It also includes raw land inventories that are under development and those that are about to undergo development.

Construction and development costs incurred pertain to amounts paid to contractors and development costs in relation to the development of land and construction of housing units, and other costs directly attributable to bringing the real estate inventories to its intended condition.

Borrowing costs capitalized to inventories for the six months ended June 30, 2023 and 2022 amounted to ₱47.2 million and ₱45.0 million, respectively (see Note 12). The capitalization rate used to determine the borrowing costs eligible for capitalization in 2023 and 2022 is 7.76% and 6.55%, respectively.

Collateralized properties

Pursuant to the loan agreement, certain real estate inventories were collateralized in favor of the bank to secure the Group's short-term and long-term debts (see Note 12). As at June 30, 2023 and December 31, 2022, the carrying values of the collateralized real estate inventories amounted to ₱502.6 million and ₱329.1 million, respectively.

Goodwill	<b>43,007</b>	43,007
	<b>₱707,756,739</b>	₱674,704,194

Deposits for purchased land pertain to installment payments made by the Group to the sellers of lands based on the sales contract. The lands are intended to be held for sale, for development in the future and for land banking. The Group made additional deposits for its land acquisition amounting to ₱245.4 million and ₱501.1 million as of June 30, 2023 and December 31, 2022, respectively. The Group made transfers of land from deposits to real estate inventory amounting to ₱172.9 million and ₱394.2 million as of June 30, 2023 and December 31, 2022, respectively (see Note 5). The Group also made transfers of land from deposits for land acquisition to investment properties upon transfer of control of the land to the Group amounting to ₱3.4 million and ₱8.8 million as of June 30, 2023 and December 31, 2022, respectively (see Note 9).

Creditable withholding taxes pertain to carry over of unapplied income tax credits and are recoverable and can be applied against the income tax payable in future periods.

Prepaid expenses consist mainly of prepaid supplies, employee benefits, rent, insurance and taxes and licenses which are applicable within one (1) year.

Costs to obtain contracts pertain to commissions paid to brokers and marketing agents on the sale of pre-completed real estate units. These capitalized costs are amortized as marketing expense under "General, administrative and selling expenses" in the consolidated statements of comprehensive income over the expected construction period using the POC following the pattern of real estate revenue recognition.

Advances to third parties pertain to payments made by the Group to its suppliers for materials to be used for the construction of its irradiation facility and for potential joint venture partners for acceptable business projects. The advances to potential joint venture partners are to be applied to the cost of the business project.

Input VAT pertains to the 12% indirect taxes passed on to the Company by its supplier and contractors in the course of its business on its acquisition of goods and services under Philippine taxation laws and regulations. Input tax is applied against output VAT.

Refundable deposits pertain to deposits for installations of water and electric utility.

For the six months ended June 30, 2022, refundable deposits written-off amounting to ₱6.7 million were recognized in the interim consolidated statement of comprehensive income.

Miscellaneous pertains to advances to suppliers and contractors.

### *Investment in PCPC*

The Group has 20% investment in PCPC. PCPC was registered with the SEC on December 18, 2007 primarily to acquire, design, develop, construct, invest in and operate power generating plants. The Group accounts its investment in PCPC as investment in associate as it exercises significant influence over PCPC.

The following table sets out the summarized financial information of PCPC as of June 30, 2023 and December 31, 2022:

*Investment in PEI*

The Group has 20% investment in PEI. PEI was incorporated and registered with the SEC on February 19, 2013 primarily to purchase, acquire, own and hold shares of stock, equity, and property of energy companies. Through its subsidiaries, PEI's focus is to develop, construct, and operate diesel power plants in Mindanao to address the ongoing power shortages in the region.

The following table sets out the summarized financial information of PEI as of June 30, 2023 and December 31, 2022:

*Investment in EWRTC*

The Group has 33.33% investment in EWRTC. The Consortium composed of EWRTC and Alloy MTD Group (represented by MTD Philippines Inc.) has submitted an unsolicited proposal to the Philippine National Railways (PNR) to build and then operate and maintain the East-West Rail Project. The East-West Rail Project is an integrated light rail mass transportation system and is intended to help alleviate the gap in the transportation infrastructure in the metropolis. This project is in line with the objective of the government to increase the ratio of rail transport systems to the rocketing ridership demand in Metro Manila and other major urban cities. The Project will involve the development, design, construction, supply, completion, testing, commissioning, and operation and maintenance of the East-West Rail Project.

As of June 30, 2023 this project has not yet started its commercial operations as it is still in process on obtaining the needed approvals and permits to start its construction.

**9. Investment Properties and Property, Plant and Equipment**

	<b>June 30, 2023 (Unaudited)</b>	December 31 2022 (Audited)
Investment properties	<b>₱457,398,671</b>	₱455,420,654
Property, plant and equipment	<b>₱1,347,410,148</b>	₱1,139,609,766

Investment Properties

The account includes land held for capital appreciation amounting to ₱313.4 million and ₱310.0 million as of June 30, 2023 and December 31, 2022, respectively, and land and building held for lease amounting to ₱144.0 million and ₱145.4 million as of June 30, 2023 and December 31, 2022, respectively.

Total additions to investment properties amounted to ₱3.4 million and ₱8.8 million as of June 30, 2023 and December 31, 2022, respectively (see Note 7).

The fair values of land and building as of June 30, 2023 and December 31, 2022, as determined by an independent appraiser using a combination of Market Data and Income Approach, amounted to ₱762.2 million and ₱758.8 million, respectively.

The value of the land was arrived at using the Market Data Approach. In this approach, the value of the land is based on sales and listings of comparable property registered in the vicinity. The technique of this approach requires the establishment of comparable property by reducing reasonable

comparative sales and listings to a common denominator. This is done by adjusting the differences between the subject property and those actual sales and listings regarded as comparable. The properties used as basis of comparison are situated within the immediate vicinity of the subject property. This valuation approach are categorized as Level 3 in the fair value hierarchy as at June 30, 2023 and December 31, 2022. The significant unobservable input to the valuation is the price per square meter.

For land, significant increases or decreases in estimated price per square meter in isolation would result in a significantly higher or lower fair value on a linear basis.

The fair value of the building was arrived using the Cost Approach. This is a comparative approach that considers as a substitute for the purchase of a given property, the possibility of constructing another property that is an equivalent to the original or one that could furnish equal utility with no undue cost resulting from delay. This valuation approach is categorized as Level 3 in the fair value hierarchy as at June 30, 2023 and December 31, 2022. The significant unobservable input to the valuation is the price per square meter.

For buildings, significant increases or decreases in the replacement and reproduction costs, in isolation, would result in a significantly higher or lower fair value of the properties.

Rental income generated from land held under lease included under “Other income” in the consolidated statements of comprehensive income amounted to ₱1.6 million for six months ended June 30, 2023 and 2022. Direct operating expense related to land held for lease included under “General, administrative and selling expenses” in the consolidated statements of comprehensive income amounted to ₱1.5 million for six months ended June 30, 2023 and 2022.

As of June 30, 2023 and December 31, 2022, the Group has assessed that its bearer plants have indications of impairment due to the palm oil plantation's bearer plants not reaching their optimal fruiting stages. For the six months ended June 30, 2023 and 2022, the Group recognized impairment loss of ₱10.4 million, to account for the estimated fruit loss due to some trees not reaching the optimal fruiting stages in accordance with the industry standard yield.

No additional impairment was recognized by the Group for the remaining bearer plants since management estimated that the recoverable amount exceeds the carrying, excluding the specific impairment as of June 30, 2023 and December 31, 2022. The recoverable amount was computed using discounted cash flows approach and considered certain assumptions such as future fresh fruit bunches production, prices, direct costs and using an average discount rate of 8.40% and 9.67% - 11.14% in 2023 and 2022, respectively.

The Group's investment properties and property, plant and equipment are not used as collateral to its short-term and long-term debts.

	<b>₱1,108,847,230</b>	₱1,084,061,250

Trade payables are noninterest-bearing and are generally on a 30 to 60-day credit terms.

Statutory payables pertain to the output tax on the sale of real estate units, dues for remittance to the Social Security System, Philippine Health Insurance Corporation, Home Development Mutual Fund, and Bureau of Internal Revenue. These are noninterest-bearing and are normally settled within one year.

Retention payables are noninterest-bearing and pertains to the amount withheld by the Group on contractor's billings to be settled upon completion of the relevant contracts within the year. The retention serves as a holdout amount withheld from the contractor to cover for back charges that may arise from quality issues in affected projects.

Others pertain to rentals, administrative expenses and other recurring expenses incurred by the Group.

## 11. Contract Assets and Liabilities

Contract assets represent the right to consideration that was already delivered by the Group in excess of the amount recognized as ICR. This is reclassified as ICR when the monthly amortization of the customer is already due for collection. The movement in contract asset is mainly due to new real estate sales contract recognized during the period and increase in POC, less reclassification to ICR.

The Group requires buyers of real estate units to pay a minimum percentage of the total contract price as reservation fee before the parties enter into a sale transaction. Payments from buyers which have not yet reached the buyer's equity to qualify for revenue recognition and excess of collections over the recognized receivables and contract assets based on POC are presented as "Contract liabilities" in the interim consolidated statements of financial position.

When the Group's current collection threshold is reached by the buyer, revenue is recognized, and these deposits and down payments are recorded as either ICR or contract asset depending on the right to demand collection. The excess of collections over the recognized revenue is applied against the receivables or contract assets in the succeeding years. The movement in contract liabilities is mainly due to the reservation sales and advance payments of buyers less real estate sales recognized upon reaching the collection threshold and from increase in POC.

The Group's contract assets and liabilities as at June 30, 2023 and December 31, 2022 are as follows:

	<b>June 30, 2023 (Unaudited)</b>	December 31, 2022 (Audited)
Current portion of contract assets	<b>₱858,455,978</b>	₱684,156,555
Noncurrent portion of contract assets	<b>914,954,294</b>	784,993,918
Contract assets	<b>₱1,773,410,272</b>	₱1,469,150,473
Contract liabilities	<b>₱301,838,007</b>	₱219,826,473

Revenue recognized from amounts included in contract liabilities amounted to ₱55.0 million and ₱73.4 million for the six months ended June 30, 2023 and 2022, respectively.

Other income recognized from forfeited reservation sales and advances payments amounted to ₱5.1 million and ₱4.5 million for the six months ended June 30, 2023 and 2022, respectively

## 16. Financial Risk Management Objectives and Policies

The Group is exposed to a variety of financial risks, which resulted from its operating, investing and financing activities in relation to its financial instruments which include financial assets comprising cash, receivables (excluding advances to officers and employees), receivables from related parties, EIFVOCI and refundable deposits included under “Other assets”. This also includes financial liabilities comprising accounts and other payables (excluding statutory payables), short-term and long-term debts. The main types of risks are market risk (mainly interest rate and equity price risks), credit risk and liquidity risk which arise in the normal course of the Group’s business activities.

The objective of financial risk management is to contain, where appropriate, exposures in these financial risks to limit any negative impact on the Group’s results and financial position. The Group actively measures, monitors and manages its financial risk exposures by various functions pursuant to the segregation of duties principle. The management takes charge of the Group’s overall risk management strategies and for approval of risk strategies and policies under the direction of the Group’s BOD.

The Group’s overall risk management program focuses on the unpredictability of financial markets and seeks to minimize potential adverse effects on the Group’s financial performance.

There were no changes in the Group’s financial risk management objectives and policies in 2023 and 2022.

The main risks arising from the use of financial instruments are credit risk, liquidity risk, interest rate risk and equity price risk. The Group’s BOD reviews and agrees with policies for managing each of these risks. These are summarized below:

### *Credit Risk*

Credit risk is the risk that a counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss.

The Group trades only with recognized, creditworthy third parties. The Group’s receivables are monitored on an ongoing basis to manage exposure to bad debts and to ensure timely execution of necessary intervention efforts. The Group’s debt financial assets are not subject to collateral and other credit enhancement except for ICRs. Real estate buyers are subject to standard credit check procedures, which are calibrated based on payment scheme offered. The Group’s respective credit management units conduct a comprehensive credit investigation and evaluation of each buyer to establish creditworthiness.

In addition, the credit risk for ICRs is mitigated as the Group has the right to cancel the sales contract without need for any court action and take possession of the subject real estate property in case of refusal by the buyer to pay on time the due ICR. This risk is further mitigated because the corresponding title to the subdivision units sold under this arrangement is transferred to the buyers only upon full payment of the contract price. In case of default, after enforcement activities, the

Group has the right to cancel the sale and enter into another CTS to another customer after certain proceedings (e.g. grace period, referral to legal, cancellation process, reimbursement of previous payments) had been completed. Given this, based on the experience of the Group, the maximum exposure to credit risk at the reporting date is nil considering that fair value less cost to repossess of the real estate projects is higher than the exposure at default (i.e., recovery rate is more than 100%).

With respect to credit risk arising from the other debt financial assets of the Group, which comprise cash and refundable deposits, the Group's exposure to credit risk arises from default of the counterparty, with a maximum exposure equal to the carrying amount of these instruments. The Group transacts only with institutions or banks which have demonstrated financial soundness for the past 5 years.

For financial assets recognized on the interim consolidated statements of financial position, the gross exposure to credit risk equals their carrying amount except for ICR and contract assets where exposure to credit risk is not significant given that title of the real estate property is only transferred to the customer if the consideration had been fully paid.

### Liquidity risk

Liquidity risk is the risk that an entity will encounter difficulty in raising funds to meet commitments associated with financial instruments. Liquidity risk may result from either the inability to sell financial assets quickly at their fair values; or the counterparty failing on repayment of a contractual obligation; or inability to generate cash inflows as anticipated.

The Group's objective is to maintain a balance between continuity of funding and flexibility through the use of bank loans and advances from related parties. The Group monitors its cash flow position and overall liquidity position in assessing its exposure to liquidity risk. The Group maintains a level of cash deemed adequate by management to finance its operations and capital requirements and to mitigate the effects of fluctuations in cash flows. The Group considers its available funds and its liquidity in managing its long-term financial requirements. It matches its projected cash flows to the projected amortization of long-term borrowings. For its short-term funding, this is backed up by contracts to sell and collaterals. Further, the Group's policy is to ensure that there are sufficient operating inflows to match repayments of short-term debt. In addition, the Group also has credit lines

available if immediate payment is needed. As part of its liquidity risk management, it regularly evaluates its projected and actual cash flows.

The tables below summarize the Group's financial assets that can be used to manage its liquidity risk and the maturity profile of its financial liabilities as of June 30, 2023 and December 31, 2022 based on contractual undiscounted payments:

### Market Risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. The value of a financial instrument may change as a result of changes in interest rates, foreign currency exchanges rates, commodity prices, equity prices and other market changes.

*Interest Rate Risk.* Interest rate risk is the risk that the fair value or future cash flows of the Group's financial instruments will fluctuate because of changes in market interest rates. The Group's interest rate risk management policy centers on reducing the overall interest expense and exposure to changes in interest rates. Changes in market interest rates relate primarily to the Group's interest-bearing debt obligations with floating interest rates or rates subject to repricing as it can cause a change in the amount of interest payments.

The following table demonstrates the sensitivity to a reasonably possible change in interest rates, with all variables held constant, of the Group's income before tax and equity, through the impact on floating rate borrowings:

	<b>June 30, 2023</b>	December 31, 2022
	<b>(Unaudited)</b>	<b>(Audited)</b>
Increase (decrease) in basis points		
200	<b>(₱30,491,180)</b>	(₱19,976,583)
100	<b>(15,245,590)</b>	(9,988,292)
(100)	<b>15,245,590</b>	9,988,292
(200)	<b>30,491,180</b>	19,976,583

*Equity Price Risk.* The Group's equity investments on golf and club shares, classified as FVOCI, are susceptible to market price risk arising from uncertainties about future values of the investment securities.

As of June 30, 2023 and December 31, 2022, the Group's exposure to equity price risk with respect to EIFVOCI is minimal.

#### Fair Value of Financial Assets and Liabilities

The following table presents a comparison by category of carrying values and estimated fair values of the Group's financial instruments as at June 30, 2023 and December 31, 2022:

\* Excluding statutory payables amounting to ₱232,433,871 and ₱168,258,043 in June 30, 2023 and December 31, 2022, respectively.

The following methods and assumptions were used to estimate the fair value of each class of financial instrument for which it is practicable to estimate such value:

- *Cash, receivables (except ICR), accounts and other payables and short term-debt.* The fair values approximate their carrying amounts as of reporting dates due to the short-term maturity of these financial instruments.

- *ICR*. The fair value of ICR due within one year approximates its carrying amount. Noncurrent portion of ICR are discounted using the applicable discount rates (Level 3 input).
- *Receivables from related parties*. Carrying amounts of receivables from related parties which are collectible on demand approximate their fair values. Receivables from related parties are unsecured and have no foreseeable terms of repayments.
- *EIFVOCI*. For unquoted equity securities, the fair value is determined using valuation techniques with inputs and assumptions that are based on market observable data and conditions and reflect appropriate risk adjustments that market participants would make for credit and liquidity risks existing at the end each of reporting period. The fair values are determined based on average selling price of price per share of similar or identical assets traded in an active market (Level 2 input).
- *Refundable deposits*. The fair values of refundable deposits are not determinable since the timing of each refund is not reasonably predictable, hence presented at cost.
- *Long-term debt*. The fair value of borrowings with fixed interest rate is based on the discounted net present value of cash flows using the PH BVAL. Discount rates used range from 7.9% to 8.3% and 5.9% to 8.4% as of June 30, 2023 and December 31, 2022, respectively. The Group classifies the fair value of its long-term debt under Level 3.

#### Fair Value Hierarchy

The Group uses the following hierarchy for determining and disclosing the fair value of financial instruments by valuation technique:

- Level 1: quoted (unadjusted) prices in active markets for identical assets or liabilities;
- Level 2: other techniques for which all inputs which have a significant effect on the recorded fair value are observable, either directly or indirectly; and
- Level 3: techniques which use inputs which have a significant effect on the recorded fair value that are not based on observable market data.

As at June 30, 2023, the Group held the following financial instruments that are measured and carried or disclosed at fair value:

	Total	Level 1	Level 2	Level 3
Carried at fair value:				
EIFVOCI	₱353,815,801	₱–	₱353,815,801	₱–
Disclosed at fair value:				
Long-term debt	1,827,768,197	–	–	1,827,768,197

During the period ended June 30, 2023, there were no transfers between Level 1 and Level 2 fair value measurements, and no transfers into and out of Level 3 fair value measurements.

## 17. Segment Information

Business segment information is reported on the basis that is used internally for evaluating segment performance and deciding how to allocate resources among operating segments. Accordingly, the segment information is reported based on the nature of service the Group is providing.

The segments where the Group operate follow:

- Real estate development - Development of land into commercial and residential subdivision, sale of lots and residential houses and the provision of customer financing for sales;
- Agricultural - Development of land for palm oil production and sale of palm oil and other palm products including, but not limited to refined bleached deodorized oil, palm olein, crude palm oil, palm stearin, palm acid oil, palm fatty acid distillate, and palm kernels.
- Power and utilities - Operating of power plants and/or purchase, generation, production supply and sale of power.
- Holding - Holding of properties of every kind and description.
- Services - Provide irradiation services for all types of goods

Segment performance is evaluated based on operating profit or loss and is measured consistently with operating profit or loss in the interim condensed consolidated financial statements.

For the six months ended June 30, 2023 and 2022, there were no revenue transactions with a single external customer which accounted for 10% or more of the consolidated revenue from external customers.

The financial information about the operations of these operating segments is summarized below (in thousands):

## 19. Other Matters

### a. Seasonality of Interim Operations

The operations of real estate are dependent on market conditions and the timing of project launches depending on several factors such as completion of plans, permits and appropriate timing in terms of market conditions and strategy. Development and construction work follow target completion dates committed at the time of the project launch.

Operations of the power plants are generally affected by the seasonality of the demands for power consumption. As such demand is not consistent within the full year, the Group usually expects high demand during the summer season.

On the other hand, for the operations of its subsidiaries which engages in trading agricultural products, these are generally affected by the climatic seasonality in which the crops needed for the products are dependent on their season of harvest.

Any unexpected change in seasonal aspects will have no material effect on the Group's financial condition or results of its operations.

### b. Subsequent Events

Amendments to the Article of Incorporation of Subsidiary

On July 24, 2023, the group has approved the amendments its subsidiary Hydro Link Projects Corp. (HLPC) of its Article of Incorporation (AOI). This amendment includes changing the name of the Corporation to "Northmin Renewables Corp. (NRC)", changing the primary purpose to "to invest in renewable energy projects and all other energy related investments"; change of principal office of the Subsidiary; and increasing the authorized capital to One Hundred Million (₱100,000,000).

### c. Restatement

The unaudited interim consolidated statement of comprehensive income for the six months ended June 30, 2022 filed by the group under SEC form 17-Q with the Philippine Stock Exchange in compliance with Section 17 of the Securities Regulations Code (SRC) and SRC Rule 17(2)(b) was restated due to the impact of December 31, 2022 annual audit adjustments to the June 30, 2022 quarterly report. As such, the adjustments resulted to ₱9.0 million decrease in revenues, ₱96.3 million increase in costs and general and administrative expenses, ₱20.8 million decrease in equity in net earnings of associates, ₱7.4 million increase in other income, ₱16.6 million decrease in other comprehensive income and consequently a ₱57.0 million increase in provision for income tax, ₱175.7 million decrease in net income, ₱175.7 million decrease in retained earnings as of June 30, 2022 and ₱0.072 decrease in basic/diluted earnings per share previously reported in the interim consolidated statements of comprehensive income and changes

in equity. Moreover, the unaudited interim consolidated statement of cash flows for the six months ended June 30, 2022 was also restated resulting to ₱44.9 increase in net cash flows used in operating activities, ₱77.0 million increase in net cash flows from investing activities, ₱44.4 million increase in net cash flows used in financing activities, and ₱3.4 million decrease in effect of exchange rates changes on cash, resulting to ₱8.9 million additional net decrease in cash. The adjustments have no impact on the consolidated statement of financial position as of December 31, 2022 presented as comparative period.

Except for the items above, there were no material, non-recurring adjustments made during the period that would require appropriate disclosures.
